PROFESSIONAL EXPERIENCE

Software Development Project Manager (September 2018 - Present) Apple Inc. and University of Naples Federico II, Naples, Italy

Partnership between University of Naples Federico II in Naples, Italy, and Apple Inc. aimed at developing apps for world's most innovative and vibrant app ecosystem.

Leads multiple projects through to completion, determining project scope and ensuring deadlines and requirements are met. Defines resource requirements, schedules, and budgets, leveraging project management software tools, methods, and resources to help plan and manage projects. Manages project risks, developing mitigation strategies and communicating impacts to senior stakeholders.

Key Achievements:

- Designed, programmed, and tested startup incubator website (<https://welunch.app>).

CEO, IT Consultant (July 2014 - Present)

ITS SRL, Naples, Italy

Customizing open source software and solutions; developing intranet and extranet web apps and portal solutions.

Identifies, advises, and recommends IT solutions and support initiatives in alignment with client business goals. Participates in project scope development, assuring client requirements are represented within every solution. Publishes open source and Software-as-a-Service (SaaS) solutions.

Key Achievements:

- Consulting with clients on technology development, assembling and installing hardware and software and leading online marketing initiatives.

Alessandro Mendoza

Page Two

- Develops and manages web portals, mobile applications, and computer graphics, managing risk and vulnerabilities and taking corrective action as needed.
- Works closely with project managers, providing strategic advice on e-commerce solutions, business intelligence, and machine learning solutions.

Front-end Web Developer Trainee (2017)

Council of the European Union, Brussels, Belgium

EU institution that defines general political direction and priorities of European Union.

Five-month contract for web development for www.consilium.europa.eu using custom Bootstrap framework. Prototyped web performance analysis tool customizing sitespeed.io-docker on restricted LAN, leading process improvements to source code development and determining SEO initiatives. Conducted web accessibility study of new regulation and application to new project and testing via Jaws screen reader.

Full-stack Developer Trainee (2016)

Zimmerman & Zimmerman, Amsterdam, Netherlands

Providing data services to governments, the UN family, Global Fund, Dutch municipalities and foundations.

Three-month internship in web development for IATISudio.com using React.js in full-stack environment. Prepared ES6 JavaScript logic to create RESTful web services (APIs). Designed client-side responsive views using Sass and JSX markup based on functional design interface. Used Agile SDLC methodology to develop software.

Key Achievements:

- Drew concept IT infrastructure based on Model View Controller with React.js, writing, implementing, and testing code to accomplish tasks.
